

# Agile QA Tester

## JOB OFFER

Are you able to challenge the status quo? Then we are looking for you!! We are currently seeking Agile QA tester to join our talented team in the “code farm” office in Rende (Cosenza). You will be responsible for driving forward our build and QA processes to ensure consistently improving quality and efficiency. You will be part of a young, fresh, and stimulating environment driving innovation to the next level.

## DUTIES & RESPONSABILITIES □

- ! Develop test cases, from functional requirements to clearly convey the business users intent.
- ! Support system development/testing/integration/deployment activities
- ! Participate in triage process, fully reproducing production issues, communicating workarounds, developing missing test scenarios and validating fixes; accurately submitting and maintaining defects in the appropriate repository.
- ! Perform manual exploratory and acceptance testing of new features being iteratively developed as part of agile development methodology.
- ! Attend system design reviews; technical interchange meetings; any other meetings as requested to support program and team
- ! Troubleshoot integration logs & JSON messages as part of integration testing
- ! Create and conduct REST & SOAP Web Service tests using Postman, SoapUI, REST API clients
- ! Create and conduct database tests using SQL scripts

## KNOWLEDGE & SKILLS REQUIRED:

- ! Familiar with Agile methodology and able to participate in sprint grooming, daily stand ups and retrospective meetings
- ! Good knowledge of QA Test estimation, Test Plan & test case creation, test execution, bug creation and bug reporting
- ! Knowledge of TDD (Test Driven Development), Functional / Integration, Regression, and UAT Testing
- ! Able to create basic SQL queries to validate the data in multiple databases
- ! Able to understand backend processes
- ! Able to identify regression scenarios to update automated
- ! Knowledge of issues tracking system (Jira)
- ! Basic programming knowledge of Java is a plus

## CANDIDATE PROFILE

- ! Bachelor’s degree in Computer Science or related field
- ! Minimum of 3 years of relevant QA technical experience
- ! Experience in creating clear, concise detail-oriented test plans/cases from specifications or verbal communication
- ! Excellent interpersonal and communication skills
- ! Excellent communication – verbal and written, in English
- ! Be a team player working with a diverse group of team members

**Location:** Rende (Cosenza)
