

Agile Business Analyst

JOB OFFER

For our offices located in Milan we are looking for an Agile Business Analyst that will assist in Product Owner engagement, backlog management, and acceptance criteria definition. The Agile Business Analyst will also serve as a knowledgeable resource in advising the Scrum Team on tools and techniques to improve the development, collection, analysis, and reporting of information.

DUTIES & RESPONSABILITIES □

- ! Analyze broadly-defined high-level epics, capabilities, and features to create a well-organized, value-driven framework to provide the required business value in the Product Backlog.
- ! Assist with Release and Iteration planning ensuring all and/or any questions, concerns and clarification is met as needed by the team(s)
Help Manage Iteration and Release backlog to keep team running efficiently
- ! Work with Scrum Master/ scrum team to write individual user stories and acceptance criteria that are clear, concise, and easy to understand and implement/ test by the development/ test team.
- ! Identify related user stories and epics, group them into themes as necessary and document the interrelationship and associated business process flows as necessary.
- ! Model the business processes.
- ! Assist Scrum Master in facilitating sprint planning sessions, reviews, and retrospectives.
- ! Serve as the Product Owner and facilitate communication with the developers and testers on assigned Scrum Team.
- ! Ability to enhance team spirit; proficient in teamwork - coordination, collaboration, facilitation, and information sharing.

KNOWLEDGE & SKILLS REQUIRED:

- ! Must: deep knowledge of business processes typical of the payment sector and of card issuing/acquiring.
- ! Knowledge of one or more regulatory/business themes: PSD2, open API
- ! Use case analysis using UML 2.0.
- ! Stakeholder analysis, managing risk, issues, and requirements.
- ! Knowledge of techniques to manage the requirements and the track of the project progress.
- ! Ability to manage and maintain requirements and design information from inception to retirement.
- ! Understanding of the banking sector and expertise in the payment domain.

CANDIDATE PROFILE

- Bachelor's Degree in Computer Science, Information Technology, Business.
- 3-5 years of functional experience as a business analyst on projects focused on Agile software development.
- 2 years of experience on projects related to payment systems and/or card issuing/acquiring.
