

Java EE Developer

JOB OFFER

Do you want to show your talent and growth professionally in a young, challenging environment? What are you waiting then? Come to talk with us! We are looking for experienced Java Developers to join us and enter in our development path and talent pipeline.

The candidate will be working for our offices located in Rende (Cosenza) with a team of experienced analysts, developers, testers and architects in order to build enterprise systems that support mission critical objectives. We need to get in touch with a dynamic, talented software developer who is ready for a challenge where teamwork, technical ability, client interaction, and problem-solving skills are essential.

DUTIES & RESPONSABILITIES

- Develop and maintain J2EE applications
- Provide operational support for existing J2EE and non J2EE applications
- Analyse, design, code, test, debug, document, and maintain applications and application enhancements
- Perform quality assurance reviews
- Provide technical documentation updated to the latest enhancement or release
- Assist in defining and meeting business requirements
- Provide guidance to less experienced programmers
- Work with legacy systems and other system migration
- Report effectively on application development
- Perform other duties as required

KNOWLEDGE & SKILLS REQUIRED

- System design using UML 2.0
- Knowledge of Enterprise Application Integration patterns (EAI, SOA, ESB)
- Maven, Jira, Arquillian or similar
- 4+ years' experience in application and web systems development in Java EE (EJB, JSF, JTA, JDBC, CDI, JAX-WS, etc), Spring 3+
- database server (such as Oracle, SQL Server, or PL/SQL)
- application server (such as WebSphere, WebLogic, or JBOSS);
- integrated development environment (such as Eclipse);
- knowledge of Docker, Kubernetes, IBM Cloud Private, Microservice Architecture, DevOps
- Experience in Application Security: Digital Signature, Cryptography, Authentication and Authorization, Data Loss Prevention, Audit and Logging, etc is a plus
- Attitude to document and troubleshoot problems
- Strong analytical and organisational skills
- Ability to handle activities at multilevel tasks

CANDIDATE PROFILE

- Bachelor's Degree in Computer Science or Information Technology
- Good level of English, spoken and written
- Good orientation in communication skills
- Great ability to work in Team
- Capable in building, managing and developing relationship
- Excellent time management and prioritisation skills
- High level of commitment and passion for achieving levels of service excellence
- Innovative thinker
- Ability to turn a problem into opportunity
- Capable to read the context and act accordingly
- Strong analytical and organisational skills
